

## IMPORTANT: PRODUCT RECALL RESCUE PRO PFD (RED)

5<sup>TH</sup> FEBRUARY 2018

Dear Customer,

During a recent routine product quality inspection, we have identified that some Rescue Pro PFD's potentially have a quality issue relating to the 50mm (Grey) webbing quick release harness. In some cases the Grey webbing tail end has not been sealed properly and is showing signs of fraying.

### IMPORTANT PLEASE NOTE:

**THIS DOESN'T AFFECT ANY RESCUE PRO PFD'S FITTED WITH A BLACK 50MM WEBBING QUICK RELEASE HARNESS - ONLY ONES FITTED WITH GREY COLOUR WEBBING.**

This production batch of PFD's can be clearly identified by the following production control number QCN: 164870001 which is printed on the internal printed label which is located on the inside of the PFD, on the back panel.

As a precaution we would request that these specified PFD's are removed from service with immediate effect together with any new stock, and arrangements made to return these to our Service Centre for further inspection.
